

SCREENSHOTS

PROJECT 1: PASSWORD STRENGTH CHECKER

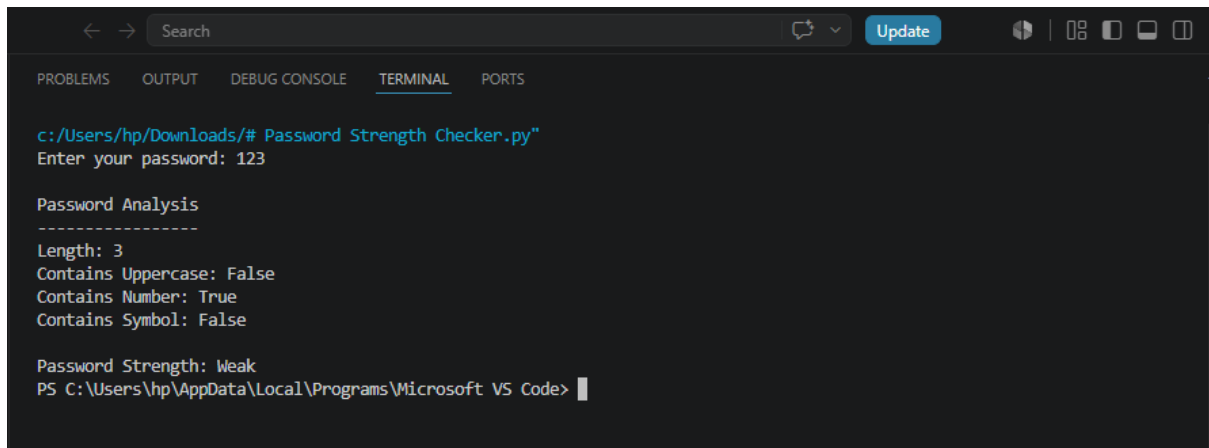

OVERALL CODE OVERVIEW:

The screenshot shows the Visual Studio Code editor with a file named 'Password Strength Checker.py' open. The code is a Python script that checks the strength of a password based on its length, presence of uppercase letters, numbers, and symbols. The Explorer sidebar on the left shows the project structure with folders for 'NO FOLDER OPENED', 'OUTLINE', 'TIMELINE', and 'MAVEN'. The code is as follows:

```
1 # Password Strength Checker
2
3 password = input("Enter your password: ")
4
5 length = len(password)
6
7 has_upper = False
8 has_number = False
9 has_symbol = False
10
11 symbols = "!@#$%^&*()-_+[]{}|;:'.<>?/~`"
12
13 for ch in password:
14     if ch.isupper():
15         has_upper = True
16     elif ch.isdigit():
17         has_number = True
18     elif ch in symbols:
19         has_symbol = True
20
21 score = 0
22
23 if length >= 8:
24     score += 1
25
26 if has_upper:
27     score += 1
28
29 if has_number:
30     score += 1
31
32 if has_symbol:
```

WEAK PASSWORD CHECKING:

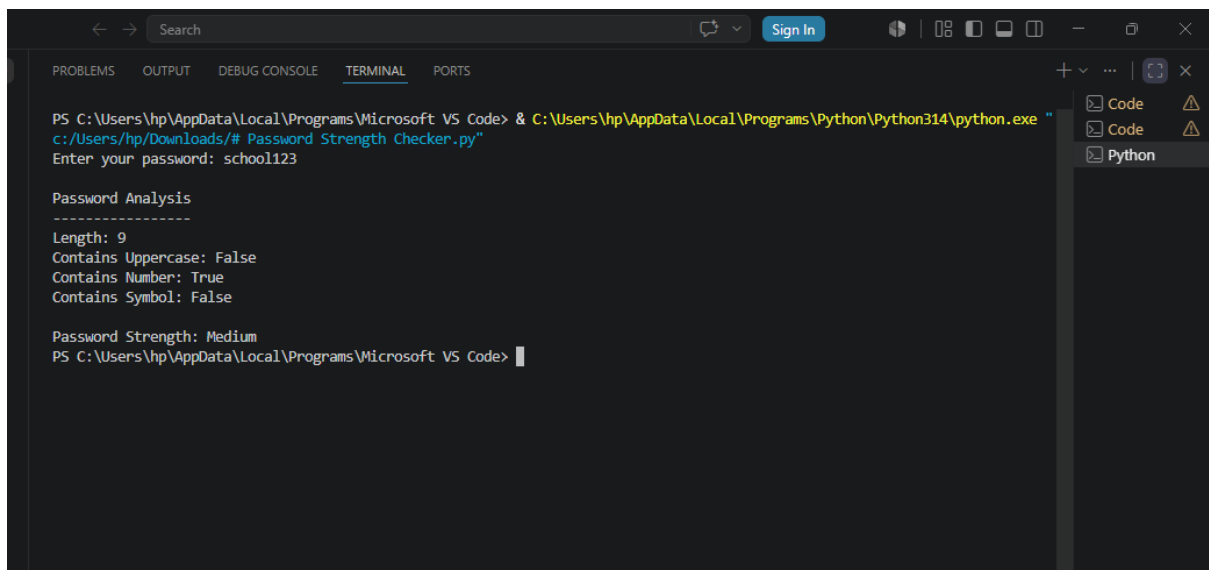

The screenshot shows the terminal output of the Password Strength Checker.py script. The user entered the password '123'. The script analyzed the password and determined it to be weak because it is too short (length 3) and does not contain uppercase letters or symbols. The output is as follows:

```
c:/Users/hp/Downloads/# Password Strength Checker.py"
Enter your password: 123

Password Analysis
-----
Length: 3
Contains Uppercase: False
Contains Number: True
Contains Symbol: False

Password Strength: Weak
PS C:\Users\hp\AppData\Local\Programs\Microsoft VS Code> |
```

MEDIUM PASSWORD CHECKING:

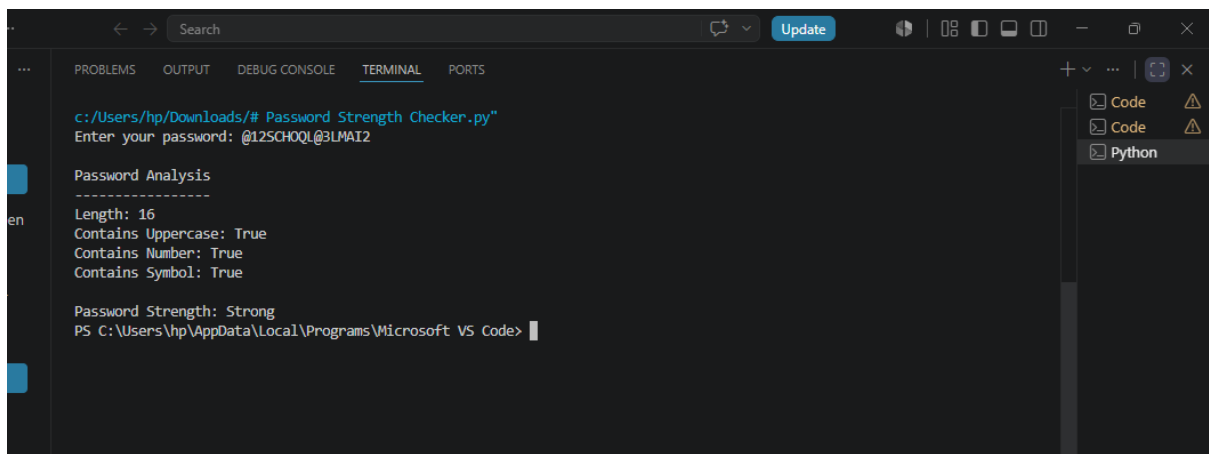

The screenshot shows the VS Code interface with the terminal panel active. The terminal displays the execution of a Python script that checks the password 'school123'. The analysis results are as follows:

```
PS C:\Users\hp\AppData\Local\Programs\Microsoft VS Code> & C:\Users\hp\AppData\Local\Programs\Python\Python314\python.exe "c:/Users/hp/Downloads/# Password Strength Checker.py"
Enter your password: school123

Password Analysis
-----
Length: 9
Contains Uppercase: False
Contains Number: True
Contains Symbol: False

Password Strength: Medium
PS C:\Users\hp\AppData\Local\Programs\Microsoft VS Code>
```

STRONG PASSWORD CHECKING:

The screenshot shows the VS Code interface with the terminal panel active. The terminal displays the execution of a Python script that checks the password '@125CHOOL@3LMAI2'. The analysis results are as follows:

```
c:/Users/hp/Downloads/# Password Strength Checker.py"
Enter your password: @125CHOOL@3LMAI2

Password Analysis
-----
Length: 16
Contains Uppercase: True
Contains Number: True
Contains Symbol: True

Password Strength: Strong
PS C:\Users\hp\AppData\Local\Programs\Microsoft VS Code>
```
